

Fred Abeka - Scrum Master Portfolio with Visuals

1. Introduction

I am Fred Abeka, a Certified Scrum Master (SMAC - 2025) with an MSc in Management. This portfolio showcases my simulated Agile experience using industry tools, realistic user stories, visual charts, sprint structures, and my facilitation of ceremonies akin to top global Agile coaches.

2. Sample User Stories

User Story 1: Reset Password Feature

User Story: As a user, I want to reset my password via email, so that I can regain access to my account if I forget my credentials.

Acceptance Criteria:

- * Password reset link is sent within 2 minutes.
- * Link expires after 15 minutes.
- * User is redirected to the login page after reset.

User Story 2: Sales Dashboard

User Story: As a sales manager, I want to view a dashboard of daily sales performance, so that I can track team productivity in real time.

Acceptance Criteria:

- * Dashboard refreshes every hour.
- * KPIs include revenue, conversion rate, and top sellers.
- * Filters for time range and region are functional.

User Story 3: Email Reminders

User Story: As a student, I want to receive email reminders before my online classes, so that I can attend sessions on time.

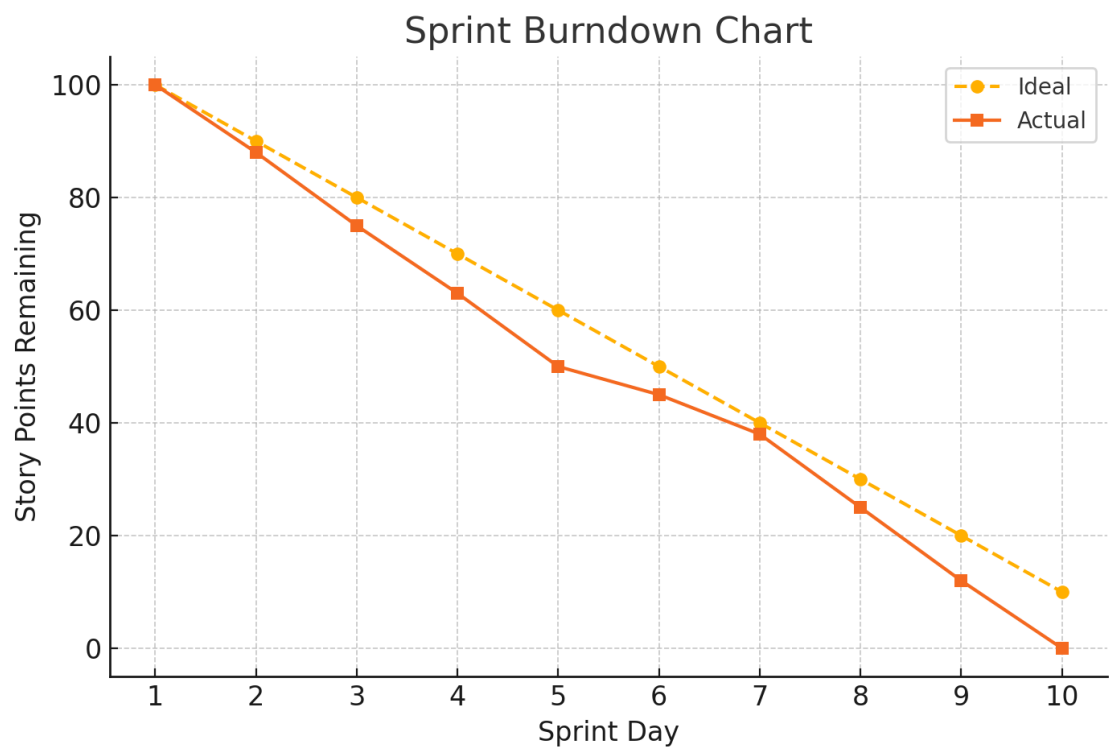

Acceptance Criteria:

- * Emails are sent 30 minutes before the class.
- * Email contains meeting link and class topic.

* User can toggle reminder on/off in settings.

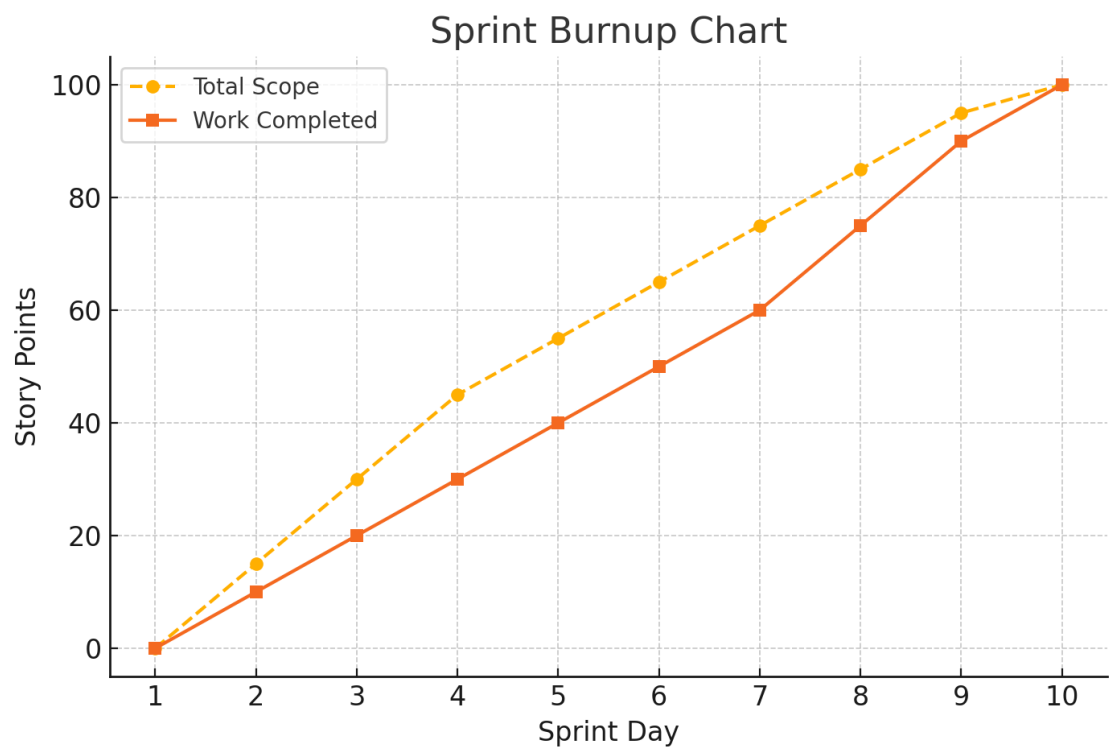

3. Sprint Burndown Chart

This chart simulates progress tracking during a sprint. It compares ideal progress vs. actual completion rate.

4. Sprint Burnup Chart

This burnup chart shows the cumulative work completed against the total sprint scope.

5. Sprint Backlog Visual (Simulated)

Below is a mock-up of a sprint backlog board as used in Jira or Trello, showing user stories in To Do, In Progress, Review, and Done columns.

6. Scrum Ceremonies & Facilitation

These simulations reflect how I facilitate key Scrum ceremonies in practice:

- Sprint Planning: defining the sprint goal and selecting backlog items.
- Daily Standups: facilitated through Slack with Jira ticket updates.
- Sprint Reviews: summary of outcomes with mock stakeholder feedback.
- Retrospectives: using Miro boards and Confluence templates.
